

CONSUS-S1™

AUXILIARY HOSE TROLLEY FOR
PRECONDITIONED AIR (PCA)

UNIQUE AND HIGHLY EFFECTIVE AUXILIARY UNIT
WITH 2 INLETS TO SUPPLY PRECONDITIONED AIR
TO STATIONED AIRCRAFTS

CONSUS-S1™

AUXILIARY HOSE TROLLEY FOR PRECONDITIONED AIR (PCA)

The CONSUS-S1™ Auxiliary Hose Trolley is especially designed for the provision of preconditioned air to stationed aircrafts needing an extension of hose to reach PCA inlet connectors. It has been specifically conceived to facilitate ease of operation by staff at the airport platform.

The CONSUS-S1™ Auxiliary Hose Trolley consists of three 14", 20' hoses installed on a rewind reel in the trolley.

Indispensable for airports with passenger boarding bridges servicing MD80 type aircrafts.

THE ADVANTAGES OF THE CONSUS-S1™

- An essential component for the transfer of preconditioned air to MD80 aircrafts
- Keeps expensive PCA hose materials protected
- Saves operator time and tarmac space
- Safer and more user-friendly than any other conventional system by avoiding the need to drag metres of heavy hoses across the tarmac
- Automation systems for extension or collection not required, which reduces maintenance costs

TECHNICAL SPECIFICATIONS

Chassis	Made of cold-rolled tube
Wheels	Four 125 mm wheels, of which two with brakes
Compartment	Compact PCA reel. Handles up to 100' of hose
Hose dimensions	60 feet long and 14 inches in outside diameter
Air input & output	Input, Standard 8 inches / output 14"
Hose connection	Simple outlet
Handrail	Railing at the rear to manipulate the trolley and place it in desired position
